PROJECTS

Noise Flag - *Live: http://noiseflag.herokuapp.com* | *Repo: https://github.com/wilkdasilk/noiseflag*
- Web app for curating crowdsourced playlists around a geolocation
- Implemented track search feature, including JSON endpoint returning Searchkick results, or if none, proxy to Spotify API using HTTParty
- Implemented check-in feature, requesting user's location via HTML5 Geolocation, or if unavailable, via IP address, and confirming proximity to flag location via Geocoder gem
- Ruby on Rails | Spotify API | Geocoder | Searchkick | Google Static Maps

Actividay - *Live: http://actividay.herokuapp.com/* | *Repo: https://github.com/medinal/actividay*
- Social app providing daily activity recommendations.
- Implemented responsive & mobile-first design via Bootstrap
- Refactored for DRY, maintainable code using shared partials with conditional views
- Ruby on Rails | CarrierWave | Devise | SASS | PostgeSQL

EXPERIENCE

USL Cargo Services via Accountemps, Newport Beach - *Accounting Assistant* | May 2016 - Dec 2016
